Patient Name: _____ Contact Number: _____

Address: _____ DOB: _____

Clinical Details and History

REQUEST

- PET + Diagnostic CT
- PET with A/C (non-diagnostic) CT only

PATIENT INFORMATION

- Diabetic No IDDM NIDDM
- Pregnant or Breast Feeding No Yes
- GFR _____ Weight _____

CLINICAL INDICATION

- SPN** ⁶¹⁵²³: if unsuitable for transthoracic FNAB, or if attempt at pathological characterisation has failed
- BREAST CA** ⁶¹⁵²⁵: STAGING of locally advanced (Stage III) Breast Ca (61524) or suspected metastatic or recurrent disease
- COLORECTAL CA** ⁶¹⁵⁴¹: RE-STAGING of suspected residual, metastatic or recurrent disease
- OESOPHAGUS / GOJ CA** ⁶¹⁵⁷⁷: STAGING of patients considered suitable for active therapy
- OVARIAN CA** ⁶¹⁵⁶⁵: RE-STAGING of suspected residual, metastatic or recurrent disease in patients considered suitable for active therapy
- CERVIX CA** ⁶¹⁵⁷¹: STAGING of FIGO stage IB2 (or greater) prior to planned curative radiation therapy or combined modality therapy
- CERVIX CA** ⁶¹⁵⁷⁵: RE-STAGING of confirmed local recurrence with planned curative salvage chemoradiotherapy or exenteration
- H&N CA** ⁶¹⁵⁹⁸: STAGING of biopsy proven newly diagnosed or recurrent H&N cancer
- H&N CA** ⁶¹⁶⁰⁴: RE-STAGING of suspected residual disease after definitive treatment in pts considered suitable for active therapy
- METASTATIC SCC** ⁶¹⁶¹⁰: STAGING of unknown primary involving cervical nodes
- NSCLC** ⁶¹⁵²⁹: STAGING where curative surgery of radiotherapy is planned
- CANCER** ⁶¹⁶¹²: INITIAL STAGING and management of rare and uncommon cancer

- LYMPHOMA** ⁶¹⁶²⁰ STAGING of newly diagnosed or previously untreated disease
HD & NHL
excluding
indolent NHL
- ⁶¹⁶²² RE-STAGING to assess response to 1st line treatment – either during treatment or within 3/12 of completion
- ⁶¹⁶²⁸ RE-STAGING of confirmed recurrence
- ⁶¹⁶³² RE-STAGING to assess response to 2nd line chemo prior to stem cell transplantation

- MELANOMA** ⁶¹⁵⁵³ RE-STAGING suspected metastatic or recurrent disease in pts considered suitable for active therapy

- SARCOMA** ⁶¹⁶⁴⁰ STAGING of biopsy-proven disease (excluding GIST), considered to be potentially curable
bone or
soft tissue
- ⁶¹⁶⁴⁶ RE-STAGING of suspected residual or recurrent disease after initial therapy to assess suitability for subsequent curative treatment

- PROSTATE** ⁶¹⁵⁶³ **PSMA / Diagnostic CT STAGING** ⁶¹⁵⁶⁴ **PSMA / Diagnostic CT RE-STAGING**

- BRAIN** ⁶¹⁵³⁸ **GLIOMA**: guide biopsy and assist post-therapy planning (or during chemo) in suspected residual/recurrent disease
- ⁶¹⁵⁵⁹ **EPILEPSY**: refractory epilepsy which is being evaluated for surgery
- ⁶¹⁵⁶⁰ **ALZHEIMER'S** **FBB** **F18 FET**
